SSIS COMPONENTS FOR
HUBSPOT

SSIS Integration Toolkit provides cost-effective, easy-to-use data integration components for HubSpot, using Microsoft SQL Server Integration Services (SSIS) as the ETL platform and data loading engine.

Data Integration Made Easy

SSIS Integration Toolkit is designed with the goal in mind that it helps maximize your development productivity by providing you a streamlined development experience. The tool handles all the intricate details involved in working with the HubSpot data model and business logics, so that you do not have to, therefore you can spend more time on your data rather than on the tool.

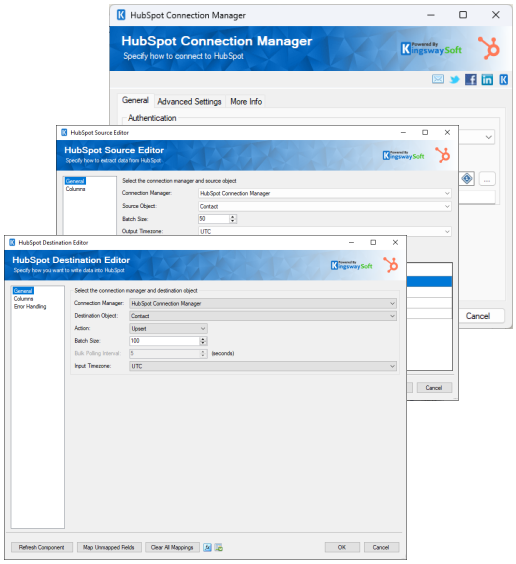
Key Features

- Complemented by SSIS capabilities, we offer the most feature-rich data integration solution for HubSpot, which enables data integration between HubSpot and virtually any other database or application systems.
- Support for reading/writing data to/from the HubSpot server.
- Refresh Component button to retrieve latest metadata from the HubSpot server.
- Starting with the Free Developer License for any interactive use, we offer the most flexible licensing model.

Main Components

HubSpot Connection Manager

- Sophisticated support for HubSpot connection using the OAuth authentication process.
- Includes API Throttling Rate setting for Throttle Limits implementation in HubSpot.
- Option to work around intermittent errors by making retry service call.



HubSpot Source Component

- Facilitates reading data from HubSpot using Source Object.
- Option to retrieve datetime fields in UTC or Local Time format.
- Capability to filter parameters for particular fields in objects.
- Option to specify toggle between decimal and bigint fields in the Columns page for numeric fields.

HubSpot Destination Component

- Support for Create, Update, Delete, Upsert actions for particular objects.
- Option to specify datetime fields in UTC or Local Time format.
- 3 Error Handling Mechanism with additional configurable columns, HubSpotRecId, IsNew.
- Advanced filtering capabilities for HubSpot field mappings.
