

SSIS INTEGRATION TOOLKIT FOR NETSUITE

SSIS Integration Toolkit for NetSuite is a cost-effective, easy-to-use and high-performance data integration solution for NetSuite Online, utilizing Microsoft SQL Server Integration Services (SSIS) as the ETL platform and data load engine.

DATA INTEGRATION MADE EASY

SSIS Integration Toolkit is designed with the goal in mind that it helps maximize your development productivity by providing you a streamlined development experience. The tool handles all the intricate details involved in working with the NetSuite data model and business logics, so that you do not have to, therefore you can spend more time on your data rather than on the tool.

KEY FEATURES

- Complimented by SSIS capabilities, we offer the most feature-rich data integration solution for NetSuite, which enables data integration between NetSuite and virtually any other database or application systems.
- Support for reading/writing data to/from NetSuite.
- Refresh Component button to retrieve latest metadata from NetSuite.
- Starting with the Free Developer License for any interactive use, we offer the most flexible licensing model.

MAIN COMPONENTS

NETSUITE CONNECTION MANAGER

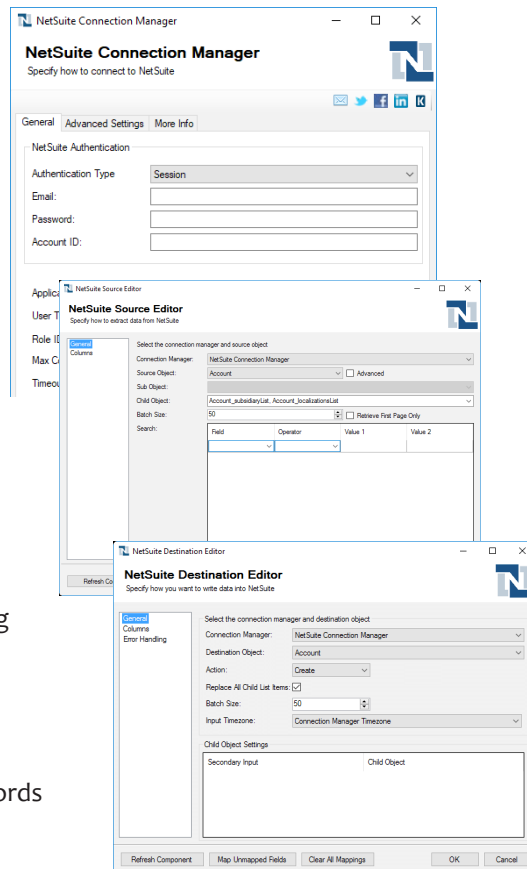

- Supports connection to NetSuite through the NetSuite API.
- Option to work around intermittent errors by making retry service calls.

NETSUITE SOURCE COMPONENT

- Facilitates reading data from NetSuite.
- Support for retrieving data from Common, Custom, or Advanced objects.
- Support for reading from Sub and Child Objects with additional outputs.
- Filter records using Field Search or Saved Search for Custom & Advanced objects.
- Support for adding custom fields.

NETSUITE DESTINATION COMPONENT

- Facilitates writing data into NetSuite using various actions such as Create, Update, Delete, or Upsert actions.
- Support multiple inputs to write to any necessary Child Object(s).
- Batch Size lets you specify how many records to send per service call to NetSuite.
- Support for adding custom fields.
- 3 Error Handling Mechanism.
- Advanced filtering capabilities for NetSuite field mappings.

BENEFITS

- One single solution that works with NetSuite.
- The toolkit helps you manage all the intricate details involved in working with the NetSuite data model.
- Easy learning curve, consistent application interface, familiar development experience within SQL Server Business Intelligence development environment (Visual Studio).
- Free developer license is available for any interactive use without any limitations.
