

SSIS INTEGRATION TOOLKIT FOR PARATURE

SSIS Integration Toolkit for Parature is a cost-effective, easy-to-use and high-performance data integration solution for Microsoft Parature, utilizing Microsoft SQL Server Integration Services (SSIS) as the ETL platform and data load engine.

DATA INTEGRATION MADE EASY

SSIS Integration Toolkit is designed with the goal in mind that it helps maximize your development productivity by providing you a streamlined development experience. The tool handles all the intricate details involved in working with the Parature data model and business logics, so that you do not have to, therefore you can spend more time on your data rather than on the tool.

KEY FEATURES

- Complimented by SSIS capabilities, we offer the most feature-rich data integration solution for Parature, which enables data integration between Parature and virtually any other database or application systems.
- Support for reading/writing data to/from Parature server utilizing the Parature SDK.
- Refresh Component button to retrieve latest metadata from the Parature server.
- Starting with the Free Developer License for any interactive use, we offer the most flexible licensing model.

MAIN COMPONENTS

PARATURE CONNECTION MANAGER

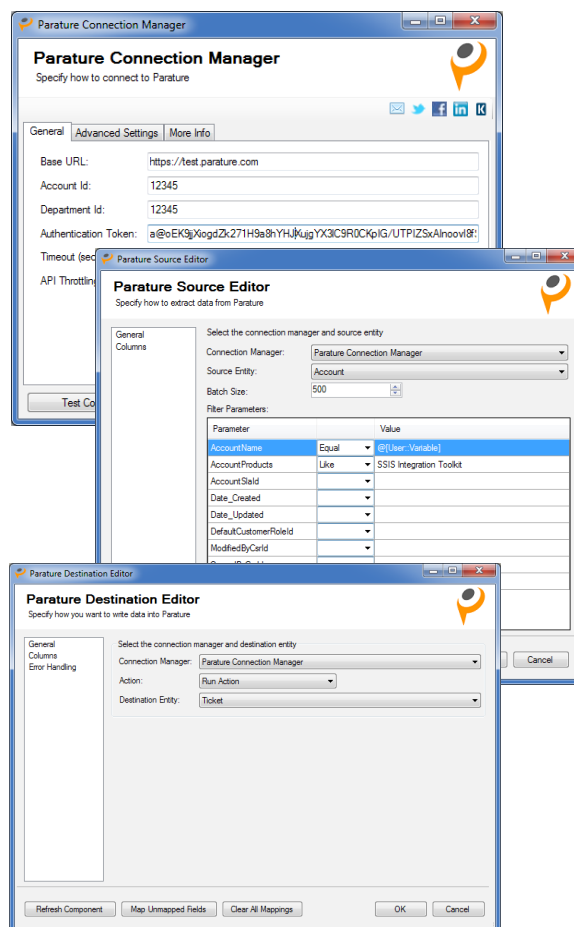

- Facilitates connection to Parature server utilizing the Parature SDK.

PARATURE SOURCE COMPONENT

- Facilitates reading data from Parature using query.
- Support for filtering fields in addition to parameterizing filter values.
- Capability to read from custom fields.

PARATURE DESTINATION COMPONENT

- Support for Create, Update, Hard Delete (Purge), Soft Delete (Trash), and Run actions.
- 3 Error Handling Mechanism with configurable Default Output ParatureRecordId.
- Text lookup configured for essential Parature fields.
- Consists of a variety of functional buttons for development purposes.
- Capability to write to custom fields.

BENEFITS

- One single solution that works for Parature.
- The toolkit helps you manage all the intricate details involved in working with Parature data model and business logics.
- Easy learning curving, consistent application interface, familiar development experience within SQL Server Business Intelligence development environment (Visual Studio).
- Free developer license is available for any interactive use without any limitations.
