KINGSWAYSOFT ANNOUNCES
2026 Release Wave 1
Unified SSIS Platform and Expanded Data Connectivity

OVERVIEW

KingswaySoft's 2026 Release Wave 1 represents one of the most significant architectural advancements in the company's history. This release unifies all SSIS capabilities under a single SSIS Integration Toolkit, replacing the SSIS Integration Toolkit - Ultimate Edition offering and establishing a consolidated foundation for our SSIS integration portfolio. In parallel, the JDBC Driver Pack continues its strategic expansion, while Integration Gateway receives focused refinements to further strengthen reliability and deployment clarity across real-time integration scenarios. Together, these advancements reinforce our long-term commitment to delivering a cohesive, scalable, and enterprise-ready integration platform.

RELEASE HIGHLIGHTS

✓ Unified SSIS platform delivered under a single SSIS Integration Toolkit licensing model

✓ JDBC Driver Pack expands its growing list of supported platforms with 38 new services

✓ Expanded SSIS service coverage for analytics, inventory, outreach, and marketing platforms

✓ Enhanced usability, security, and runtime reliability across SSIS and Integration Gateway

ABOUT KINGSWAYSOFT

KingswaySoft is a leading provider of enterprise data integration solutions, serving organizations across more than 110 countries. Our portfolio includes SSIS-based integration components, JDBC-based connectivity solutions, and real-time integration capabilities, all designed to support modern data architectures. We are committed to continuous enhancement, delivering reliable and flexible solutions that help organizations streamline operations and achieve measurable results.

JDBC DRIVER PACK EXPANSION

The JDBC Driver Pack has been expanded with 38 new services, providing structured, SQL-based access to API-driven platforms used for DevOps, collaboration, analytics, finance, and marketing. Newly added and expanded services include systems such as **Azure DevOps**, **SharePoint**, **Power BI**, **Okta**, and **Klaviyo**, enabling Java-based workloads and analytics tools to work with operational and platform data without custom API work.

SSIS INTEGRATION TOOLKIT ENHANCEMENTS

SSIS SharePoint
Recycle Bin support for delete operations, providing safer data removal and recovery options.

SSIS Microsoft Dynamics 365
Improved audit log performance, Azure Arc based managed identity support, and added configuration options including Include Certificate Chain in Assertion and Remember My Choice.

SSIS Salesforce
OAuth client credentials authentication for secure, reliable server-to-server integrations.

SSIS HubSpot
Improved Search API scalability by addressing the 10,000 record limit for high-volume HubSpot data extraction.

SSIS NetSuite
New Upgrade SOAP to REST capability simplifies migration from SOAP endpoints to REST services.

SSIS Project Server
OAuth authentication support has been added in the Project Server connection manager.

New SSIS service support has been added for Zoho Inventory, Outreach, EmailOctopus, and Splunk, extending connectivity across inventory, outreach, marketing, and log analytics platforms.

- MongoDB: GridFS support for large file storage and retrieval scenarios
- PGP Encryption and Compression Tasks: Cloud path support
- Snowflake: Internal Stage support for Bulk Copy operations
- Kafka: OAuth authentication support for secure integrations

INTEGRATION GATEWAY REFINEMENTS

Improved certificate handling, clearer SQL Server version detection, and more informative system feedback for real-time deployments.

One Unified Solution

SSIS Integration Toolkit
Data Integration Made Easy
