KINGSWAYSOFT ANNOUNCES

2026 Release Wave 3

Broader Connectivity and Expanded Integration Capabilities

OVERVIEW

KingswaySoft's 2026 Release Wave 3 expands the business data organizations can bring into reporting, analytics, and operational workflows. The SSIS Integration Toolkit extends support for AI, financial, marketing, and commerce systems, with more flexible Dataverse/CRM extraction and expanded processing options for demanding workloads. The JDBC Driver Pack broadens SQL-based access to additional applications, cloud services, and data formats.

RELEASE HIGHLIGHTS

- New SSIS services and Dataverse/CRM capabilities expand integration options
- Parallel destination writes support higher-volume API integration workloads
- 23 newly added JDBC services broaden API-based connectivity options
- Introducing EasySync, a new codeless data synchronization platform

ABOUT KINGSWAYSOFT

KingswaySoft is a leading provider of enterprise data integration, connectivity, and synchronization solutions, serving organizations in more than 110 countries. Our portfolio includes SSIS-based integration components, JDBC-based connectivity solutions, real-time integration capabilities, and EasySync for scheduled data synchronization. Through continuous enhancement, we deliver reliable and flexible solutions that help organizations improve operational efficiency, simplify connectivity challenges, and support evolving data strategies.

SSIS INTEGRATION TOOLKIT ENHANCEMENTS

New Anthropic and Wave Accounting integrations, dedicated WooCommerce components, and expanded Salesforce Marketing Cloud REST connectivity broaden support for AI, financial, commerce, and marketing workflows.

ANTHROPIC | WOO COMMERCE | salesforce marketing cloud | wave ACCOUNTING | SQL Server CDC Source Component +Task

- Dataverse/CRM: Adds a SQL Query source type, business logic bypass options for authorized retrieval requests, and additional timezone controls.
- SQL Server CDC: New Premium SQL Server CDC Source and Command Task components retrieve captured changes and coordinate incremental processing.
- Parallel Writes: REST and GraphQL Destination components add multithreaded writing for higher-volume API workloads.
- Bulk Operations: ADO.NET and MySQL destinations add bulk support for Update, Upsert, Delete, and Full Sync.

EXPANDED JDBC DRIVER PACK

The JDBC Driver Pack expands its existing catalog with 23 new drivers for business applications, marketing, collaboration, content management, cloud storage, and data formats. Notable additions include SugarCRM, Microsoft Teams, LinkedIn Business, MYOB, DocuSign, Odoo, and Premium Excel. These additions extend database-like access to more business data through standard JDBC interfaces and familiar SQL-style searches.

INTRODUCING EASYSYNC

EasySync provides a codeless way to manage recurring data synchronization from supported services and databases into a target database. With more than 100 supported connectors, its web interface combines job configuration, scheduling, and execution monitoring.
